

# Thanks for Helping Us Grow

Every day more and more professional wood-flooring craftsmen and manufacturers are discovering and *preferring* Timbermate wood-filler over the brands they used to work with.

Here's why. Timbermate is the only wood-filler that promises not to sink, shrink, crack, or fallout. It works with any finish, is freeze/thaw stable, can

be reconstituted when it dries out, and mixes perfectly with oil or latex tints or stains – it stains like “real wood.”

Can it multi task? You bet! Timbermate is the best spot, trowel or grain-filler you'll ever use.

**See for yourself at booth 643. Or call toll free 866 563-MATE (6283) for your free sample.**
